

MFL CURRICULUM INTENT

Through studying a modern foreign language, students should develop their ability to communicate independently in speech and writing with speakers of the language for authentic purposes and about subjects which are meaningful and interesting to them. Students will also develop their reading and listening skills which will support their literacy abilities in their own language as well as the language being studied.

In order for our students to learn languages efficiently, we need to ensure a 'change to long-term memory.' We cannot ignore that just as it takes time to learn to play the piano, so it does to learn a foreign language. Much practice, repetition and dedication will be needed for those willing to take full advantage of all the benefits. Students will be exposed to vocabulary, grammar and phonics which are the building blocks for language learning.

Furthermore, our curriculum aims to ensure 'liberation from INSULARITY', allowing students to describe the world around them, the way it reflects or even shapes one's culture, all of it helps us to understand that other way of life.

Studying Modern Foreign Languages will enhance students' problem-solving capability, it will widen their horizons as well as increase their marketability in the world of work.
